

SFO cable system

Significant space-saving splitter solution

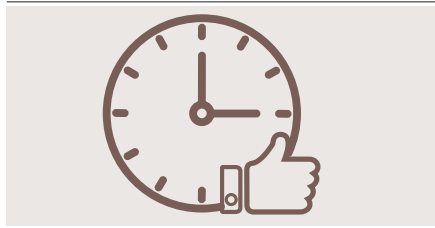

11.2020

Reduce complexity

The versatile SFO (Splitter Fan-Out) cable system combines the functions of a patch cord, a splitter box and a fan-out cable in one single product.

Improve efficiency

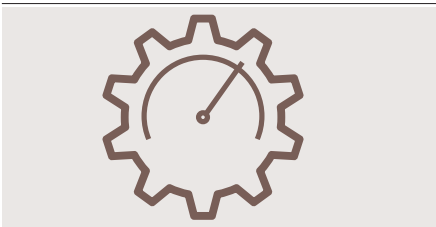

With fewer connections, installation is fast and easy, leading to reduced failure rates.

Save valuable rack space

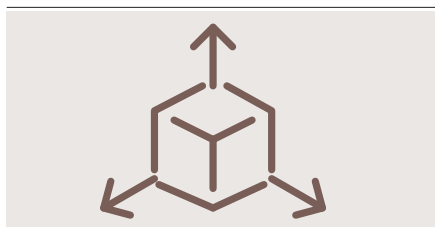

The ultra-small plastic splitter enclosure saves space even in fully equipped racks.

Strengthen signal performance

Less connections mean lower insertion loss ensuring smooth operations in applications now and in the future.

Ensure scalability

Efficiency gains combined with a space-saving design provide future-ready scalability.

Invest in growth

More space means more room for new revenue-driving equipment.
